Balkan Conflicts (1991 - 1995) (1998 - 2001)

Former Yugoslavia

The disintegration of former Yugoslavia post cold war saw conflicts which became mediated and produced peace agreements in Slovenia (where the brief independence conflict was mediated by the EC Troika in 1991), Croatia (between Croatian and Serb populations 1991-1995), in Bosnia (between Croatian, Serb and Bosniak populations 1992-1995), in Macedonia (where mediation played a key pre-emptive role in preventing large scale conflict in 2001), in Kosovo (between Kosovar Albanians and Serbian population and the Federal Republic of Yugoslavia (FRY), but also between FRY and NATO, 1998-1999), and a conflict in the Presevo Valley (between Albanians in South Serbia and FRY, 2000-2001). The continued fall-out of the disintegration of former Yugoslavia also saw mediated agreement and ultimate dissolution of the Union between Serbia and Montenegro.

Bosnia-Herzegovina

In 1991, after nationalist parties won the first multi-party elections in the Socialist Federal Republic of Yugoslavia, a violent process of disintegration commenced. With its mixed population, Bosnia-Herzegovina became the centre of the following civil war that began in 1992 between the newly formed army of the Republic of Bosnia and Herzegovina (mostly Muslim Bosniacs), and the parastatal forces of self-declared Bosnian Croat (Herzeg-Bosnia) and Bosnian Serb (Republika Srpska) entities within Bosnia-Herzegovina, supported by Croatia and Serbia, with various, often short-lived, coalitions. The General Framework Agreement (Dayton Peace Agreement), signed in 1995, split the country into two ethno-federal entities, the Bosniak-Croat Federation and the Republika Srpska, and included continued peacekeeping and institutional administration by international actors.

Kosovo

The conflict between Serbs and Kosovar Albanians has a long history and always involved territorial disputes as well as ethno-political, cultural and linguistic factors. The most recent phase of the conflict began in November 1997 when the Albanian Kosovo Liberation Army (KLA or UCK) began their campaign for the independence of Kosovo from the Federal Republic of Yugoslavia (FRY – then Serbia and Montenegro). The subsequent war lasted until the NATO intervention, which undertook bombing campaigns of Belgrade and other places in Serbia during spring 1999. The main agreements solving the conflict were internationally driven and, finally, a UNSC resolution imposed a post-conflict arrangement in the wake of what was essentially a NATO military victory. In February 2008, Kosovo's parliament declared independence, but independence is still internationally disputed.

All technical information requested by the United Nations Protection Force (UNPROFOR) in order to make the above-mentioned water supply systems operational shall be made available without delay. This will in particular include: (a) Layout and technical specifications for installations, pipelines, power lines and associated facilities; (b) Information concerning assessments of damage; (c) Assessments concerning repair work needed as well as requirements for such work...

Page 2, I. WATER, 3.3

Full security will be guaranteed for all installations, facilities and working teams involved during the period of restoration of the water supply systems as well as after they have been put into operation. Within the Zone of Separation UNPROFOR will, for the duration of its mandate, provide this security in accordance with the Cease-fire Agreement.

Page 2, I. WATER, 3.4

UNPROFOR or experts appointed by UNPROFOR, with the cooperation of the signatories to this Agreement, will carry out inspections of all facilities and installations in order to assess damage, requirements for repair work and spare parts as well as the time required to make the water supply systems operational.

Page 2, I. WATER, 3.6

A timetable will be established by UNPROFOR after consultations for the repair work of each water supply system.

Page 2, I. WATER, 3.7

The repair work required will be commenced as soon as the results of the inspections of each supply system are available. Wherever such inspections have already been carried out, repair work will commence immediately. UNPROFOR will supervise the repair work and assist where appropriate.

Page 2, I. WATER, 4.1

Requirements following the completion of repair work of the water supply systems: The regular supply of water will commence immediately after the completion of work required at each supply system and when the Joint Commission has declared each system operational.

Page 2, I. WATER, 4.2

Requirements following the completion of repair work of the water supply systems:... The methods and location for measuring the quantity and monitoring the quality of water shall be determined for each water system of the areas listed by the Joint Commission based on relevant technical considerations. The price of the water to the user will be agreed in the Joint Commission before the beginning of delivery of the water.
