Page 1, I. WATER, 3.1
All technical information requested by the United Nations Protection Force (UNPROFOR) in order to make the above-mentioned water supply systems operational shall be made available without delay. This will in particular include: (a) Layout and technical specifications for installations, pipelines, power lines and associated facilities; (b) Information concerning assessments of damage; (c) Assessments concerning repair work needed as well as requirements for such work...

Page 2, I. WATER, 3.3
Full security will be guaranteed for all installations, facilities and working teams involved during the period of restoration of the water supply systems as well as after they have been put into operation. Within the Zone of Separation UNPROFOR will, for the duration of its mandate, provide this security in accordance with the Cease-fire Agreement.

Page 2, I. WATER, 3.4
UNPROFOR or experts appointed by UNPROFOR, with the cooperation of the signatories to this Agreement, will carry out inspections of all facilities and installations in order to assess damage, requirements for repair work and spare parts as well as the time required to make the water supply systems operational.

Page 2, I. WATER, 3.6
A timetable will be established by UNPROFOR after consultations for the repair work of each water supply system.

Page 2, I. WATER, 3.7
The repair work required will be commenced as soon as the results of the inspections of each supply system are available. Wherever such inspections have already been carried out, repair work will commence immediately. UNPROFOR will supervise the repair work and assist where appropriate.

Page 2, I. WATER, 4.1
Requirements following the completion of repair work of the water supply systems: The regular supply of water will commence immediately after the completion of work required at each supply system and when the Joint Commission has declared each system operational.

Page 2, I. WATER, 4.2
Requirements following the completion of repair work of the water supply systems:... The methods and location for measuring the quantity and monitoring the quality of water shall be determined for each water system of the areas listed by the Joint Commission based on relevant technical considerations. The price of the water to the user will be agreed in the Joint Commission before the beginning of delivery of the water.

Page 2-3, II. ELECTRICITY, 2.1
The following high-tension transmission lines shall be opened for unimpeded and regular use. (a) The Mraclin-Brinje 220 kV transmission line; (b) The Gradiška-Medufic 100 kV transmission line; (c) The Obrovac-Zadar 110 kV transmission line; (d) The Meline-Obrovac-Konjsko 400 kV

The following water supply systems: (a) Obrovac-Zadar-Benkovac-Kakma-Biograd-Filip Jakov; (b) Cikola-Drniš; (c) Medak-Gospic-Korenica; (d) Petrinja-Sisak; (e) Gacka-Vrhovine; (f) Sumetlica-Pakrac-Lipik. The Joint Commission will be examining other water-supply systems, using the same criteria for inclusion.

Page 1, I. WATER, 2.

The systems mentioned in paragraph 1.1 shall be restored and opened for the unimpeded and regular supply of water within the optimal capacity of the existing systems.

Page 1, I. WATER, 3.1

All technical information requested by the United Nations Protection Force (UNPROFOR) in order to make the above-mentioned water supply systems operational shall be made available without delay. This will in particular include: (a) Layout and technical specifications for installations, pipelines, power lines and associated facilities; (b) Information concerning assessments of damage; (c) Assessments concerning repair work needed as well as requirements for such work; (d) Information concerning requirements for demining of any installations connected to these water supply systems and their surrounding areas.

Page 2, I. WATER, 3.3

Full security will be guaranteed for all installations, facilities and working teams involved during the period of restoration of the water supply systems as well as after they have been put into operation. Within the Zone of Separation UNPROFOR will, for the duration of its mandate, provide this security in accordance with the Cease-fire Agreement.

Page 2, I. WATER, 3.4

UNPROFOR or experts appointed by UNPROFOR, with the cooperation of the signatories to this Agreement, will carry out inspections of all facilities and installations in order to assess damage, requirements for repair work and spare parts as well as the time required to make the water supply systems operational.

Page 2, I. WATER, 3.6

A timetable will be established by UNPROFOR after consultations for the repair work of each water supply system.

Page 2, I. WATER, 3.7

The repair work required will be commenced as soon as the results of the inspections of each supply system are available. Wherever such inspections have already been carried out, repair work will commence immediately. UNPROFOR will supervise the repair work and assist where appropriate.

Page 2, I. WATER, 4.1

Requirements following the completion of repair work of the water supply systems: The regular supply of water will commence immediately after the completion of work required at each supply system and when the Joint Commission has declared each system operational.

Page 3, II. ELECTRICITY, 3.1
Requirements prior to the restoration of the objects mentioned in paragraph 2.1: International expert teams, where appropriate under the auspices of UNPROFOR, shall inspect all segments of the transmission lines that are subject to this Agreement.

Page 3, II. ELECTRICITY, 3.3
Requirements prior to the restoration of the objects mentioned in paragraph 2.1: The de-mining and repair of the transmission lines will commence as soon as the results of the inspection of each line are available, under the supervision and with the assistance of UNPROFOR and/or international experts where appropriate.

Page 3, II. ELECTRICITY, 4.1
Requirements following the opening of the transmission lines: UNPROFOR and/or international experts shall have free access to the transmission lines and related facilities for the purpose of verifying and securing unimpeded and regular use.

Page 4, II. ELECTRICITY, 9.1
Requirements following the return of the generator poles to the Obrovac power plant: The generator poles, once installed in the Obrovac power plant, shall be inspected by UNPROFOR and/or international experts prior to being put into operation.

Enforcement mechanism Page 6, VI. PROVISIONS FOR IMPLEMENTATION, A. Joint Commission, 2. The Joint Commission will be responsible for implementing all parts of this document as well as other and similar agreements which may be concluded as a follow-up to this document.

Page 6, VI. PROVISIONS FOR IMPLEMENTATION, A. Joint Commission, 3.1 Membership of the Joint Commission will be as follows: Two Co-Chairmen of the Joint Commission appointed by the Co-Chairmen of the Steering Committee of the International Conference on the Former Yugoslavia. One representative appointed by each of the signatories to this Agreement. One representative of UNPROFOR. Each member of the Joint Commission will be accompanied by one associate and may call on other experts to attend the meetings.

Page 6-7, VI. PROVISIONS FOR IMPLEMENTATION, A. Joint Commission, 4.1 Any disputes or breach of the provisions of this Agreement as well as any other matter that requires further clarification or deliberation shall be brought to the attention of and resolution by the Joint Commission. Should any dispute or breach of the provisions of this Agreement occur, no retaliation or unilateral action shall take place. In cases where agreement cannot be reached by consensus, the Co-Chairmen of the Joint Commission will try to arbitrate. In the event that their proposal is not acceptable, an appeal can be made to the Co-Chairmen of the Steering Committee of the International Conference on the Former Yugoslavia, whose arbitration shall be final.
