Local agreement properties

Process type Formal structured process

Rationale -> Link to national level; external support mechanism; culture of signing The agreement was supported by two locally-establish mechanisms, including the Quartet Commission for Dialogue and Agreement composed of the Committee of Dialogue and Communication in al-Zintān.

Is there a documented link to a national peace process? Yes

Link to national process: articulated rationale Although the agreement was triggered by a specific and localised event (helicopter crash), it involves representatives of two cities that support opposing sides in the conflict. Moreover, the victims of the crash included a military commander involved in the Libyan civil war and the General National Congress of Libya declared three days of national mourning for the victims of the incident. The agreement thus seems linked to the national process.
