Local agreement properties

Process type Formal structured process

Rationale -> Link to national level; external support mechanism; culture of signing It appears that it is a formal national mechanism that aims to solve the conflict at a local level. The agreement is part of a larger peace process made of several UN-sponsored peace agreements aimed at bringing an end to the Battle of Tripoli. It is also embedded in a culture of signing (and supporting) agreements in this locale and in this timeframe (August/September 2018). The agreement aims to "consolidate the ceasefire" agreed on the 4th of September.

Is there a documented link to a national peace process? Yes

Link to national process: articulated rationale The ceasefire is linked to the national process. It was mediated between state and non-state parties under the support of the United Nations Support Mission to Libya (UNSMIL). Moreover, it mentions a statement made by the UN Security Council. It also includes reform to security arrangements committee, which was mandated by the LPA (2015); as well as the promise of an economic reform package. It also negotiates the withdrawal of non-state militias from state institutions, a promise that they will not seize them in the future and a formal revoking of state-sanctioned authority to militias to complete certain tasks.

Name of Locale Greater Tripoli

Nature Of Locale Region
