Local agreement properties

Process type	Informal but persistent process
Rationale	-> Local issues only; no external support mechanism; no culture of signing This is the only written agreement referenced in the database between a Salafi-jihadi group and the nationalist Syrian group. Moreover, the agreement relates to specific issues that arose in a highly localised context. If one takes Idlib governorate as the unit of reference though, a series of agreements have been signed in the context of infighting between armed groups for control over territories, resources and populations.
Is there a documented link to a national peace process?	No
Link to national process: articulated rationale	No link to the national peace process in Syria is mentioned in the agreement, neither it can be inferred from further research. The agreement does not involve local governance actors, and the signing parties themselves are not official state representative.
