Local agreement properties

Process type	Informal but persistent process
Rationale	-> Link to national level; no external support mechanism; culture of signing Although it is unclear whether the agreement was supported by a formally-established mechanism, it is clearly embedded in a culture of signing (and supporting) agreement in this locale and timeframe. The agreement apparently is a fruit of a negotiation process in the form of "direct and indirect communication between the parties to the conflict and between the commanders of the regions".
Is there a documented link to a national peace process?	Yes
Link to national process: articulated rationale	The agreement seems to be clearly linked to the national process. It is introduced with the phrasing "To Our Great Nation". Moreover, the agreement was signed by representatives of cities that support opposing actors in the Libyan conflict.
