Local agreement properties

Process type	Formal structured process Isolated example
Rationale	The agreement is based on inter-communal dialogue and based on ongoing dialogue supported by community groups, chiefs and international bodies. While it is not clear there are other agreements related to this being signed in the local area, there are structured efforts towards implementation and communities reported in 2022 the positive impacts of the local process, citing the presence of more organised security providers in the areas concerned following up the agreement.
Is there a documented link to a national peace process?	No
Link to national process: articulated rationale	The agreement is part of a more regional process and people-to-people focused practice of peace making which have played a critical role in reducing fighting. There is less clarity about the monitoring and feedback mechanisms linking them both up and down between local and the national. These kind of agreements can be seen to supplement but not substitute for the national process.
